Event Report

Date: 26th November 2014

Name of the Event: Pioneer Convergence 2014

Date of the Event: 22nd November 2014 to 23rd November 2014

Participants: PIBM Students, Faculty Members, Staff

Report of the Event: The 2014 version of Pioneer Convergence was a two-day long event. Guests from esteemed organisations and industries were present at the event. Events similar to Pioneer Convergence were organised to discuss the pressing matters of the hour which had grabbed a lot of attention from the public and businesses. Insights straight from the horse's mouth would have a positive impact on students.

This year, panels of Pioneer Convergence discussed various topics that had created a lot of buzz in the Indian economy. Topics such as 'How to retain best employees', 'best ways of showing appreciation toward employees', 'building a high performing organisation', 'evolution of e-commerce in India', 'impact on brick and mortar due to e-commerce', 'learning for India from the e-commerce ecosystem in China and USA' were discussed at length.

In addition to the above discussion through panels, a few of the topics such as 'management skill for practising and new manager', 'power of dreams', 'role of HR in time of down and global volatility', and 'future of Indian FMCD industries' were discussed individually by the guests. PIBM management made sure that all of these discussions remain interactive in nature. An interaction was necessary to clear the doubts and get the thinking process aligned with the perspective of a corporate.

Event Report

Date: 18th February 2015

Name of the Event: The Tech Hour

Date of the Event: 14th February 2015

Participants: PIBM Students, Faculty Members, Staff

Report of the Event: The Tech Hour was organised on 14th February 2015 at the Pirangut campus of Pune Institute of Business Management. A large number of MBA and PGDM students had a technical education background. Often their interaction with the academic team ends up with queries like what kind of job profiles they could expect, what are the recent trends they should be more focused on etc. In search of a proper answer with justification, the event was organised to help students interact with the eminent members of the IT industries.

The recent trends of the year, internet of things, 3D printing, cloud computing were discussed by the members. The future aspects of these facilities were also described by the panel members. The members suggested the skills students should acquire to make them ready for the technical world. Similarly, they also enlightened the students with the job profiles that are being created for the students with the techno-commercial educational background.
